As the CEO of SleepMaker, I deeply understand that sleep is not just a physiological need, but a cornerstone of both physical well-being and overall life quality. For over a century, SleepMaker has been committed to exploring and perfecting the true essence of sleep. We are not only dedicated to providing our customers with comfort, but also to pioneering a sleep experience that blends cutting-edge technology with premium natural materials, leading the global movement toward eco-conscious sleep.

Over the past 100 years, we have witnessed the evolution of sleep from a basic necessity to a holistic concept of health and wellness. We believe that truly high-quality sleep depends not only on nature's natural materials, but also on modern technological innovations. Quality sleep is more than surface-level comfort; it involves a comprehensive optimization of temperature regulation, hygiene, material support, and biological needs across multiple dimensions.

With a century of expertise and continuous innovation, SleepMaker merges leading-edge technology with natural materials to create a sleep environment that is healthy, natural, and optimized in every way. Each night's sleep happens naturally through the synergy of technology and nature, supporting full-body recovery and revitalizing energy.

What we advocate is not just a sleep method, but a lifestyle—one where technology and nature coexist in perfect harmony in every detail. SleepMaker's century-long pursuit has always been centered around one core mission: to help every individual enjoy the most natural, scientifically-backed sleep, reclaiming vitality and facing each new day with renewed energy.

# From Inception To 175 Years

从起步到175年

## 175 Years Of History

### 175年的岁月

175 年的岁月，见证了造梦者的不断蜕变。从最初的手工制作，到今天与科技深度结合的全维度睡眠系统，我们的初心始终不变——为每个人提供更健康、更自然的睡眠。这一路走来，造梦者一直秉持着对“睡眠本质”的深刻理解，并在每个细节中注入创新与关怀。

175 years have witnessed the continuous transformation of SleepMaker. From the initial hand-made production to today's multi-dimensional sleep system deeply integrated with technology, our original intention remains unchanged - to provide healthier and more natural sleep for everyone. Throughout this journey, SleepMaker has always upheld a profound understanding of the essence of sleep and infused innovation and care into every detail.

## My Initial Dream

### 最初的梦想

1850 年，造梦者的创始人始终坚信，睡眠不仅是身体的休息，更是生命的自我修复过程。早期，品牌通过天然材料，如羊毛、有机棉，手工打造舒适床品，为人们提供了一种回归自然的睡眠方式。那时，品牌的理念就已经明确：真正的好睡眠，应该在自然与健康之间找到平衡。

In 1850, the founder of SleepMaker firmly believed that sleep was not only a rest for the body, but also a self-repairing process of life. In the early days, the brand handcrafted comfortable bedding using natural materials such as wool and organic cotton, providing people with a way to return to nature for sleep. At that time, the brand's philosophy was already clear: true good sleep should find a balance between nature and health.

“我们用百年的时间  
研究睡觉这件事儿，  
我们只相信优质的  
内材和始终坚持的精湛技艺  
才是设计和制造  
完美床垫的唯二法宝”。

——特纳儿家族

我们相信，真正的好睡眠，不仅仅是表面的舒适感，而是要从多个维度进行全面优化。因此，造梦者的每一款床品和睡眠系统，都经过精心设计，确保在温度、支撑、卫生等方面达到最完美的平衡。我们不依赖简单的智能硬件，而是通过自然与科技的巧妙结合，让每一夜的睡眠都更自然、更健康。

For SleepMaker, sleep is not just about a comfortable mattress, but a complex and profound biological process. We not only focus on the comfort of mattresses, but also optimize multiple dimensions of sleep through meticulous research and design, including temperature regulation, humidity control, antibacterial and anti-mite functions, and ergonomic support. Every product of SleepMaker is designed to help you achieve optimal recovery during every night's sleep.

We believe that true good sleep is not just about superficial comfort, but a comprehensive optimization from multiple dimensions. Therefore, every piece of bedding and sleep system of SleepMaker is carefully crafted to ensure the most perfect balance in terms of temperature, support, hygiene, and other aspects.
